Hiring team, Bluewater Ledger

Re: Machine Learning Engineer, Risk

I spent two years keeping payments APIs correct and fast at Brightpath, so I know what a 40-millisecond budget feels like from the serving side.

Since then I have added the modeling half: a two-tower recommendation model shipped through an A/B test at Halespring, behind a BigQuery feature store with hourly freshness SLAs, and drift alerts in my eval harness that page before quality falls.

Fraud is where those two halves meet, and where partnering with analysts to turn case reviews into labels sounds like the job I want.

Sincerely,

Jane Doe
