Re: Forward Deployed Engineer

I want the job where the model meets the claims adjuster. I have built the pieces separately: a retrieval assistant with hybrid search, an eval harness that gates releases, and a recommendation model I demoed weekly to non-technical stakeholders. Your Forward Deployed role makes those one job.

Your posting treats guardrails and audit trails as first-class work. That matches how I built audit logging into my internship project, and why my eval harness exists at all: I stopped trusting my own demos.

I am on F-1 OPT and will need H-1B sponsorship, which your posting welcomes. I would love to walk through any of these projects live.

Sincerely,

Jane Doe
