Hiring team, Quartzline Systems

Re: Software Engineer, Distributed Storage

My favorite compliment at Brightpath was that my changes were boring. The p99 win on our payments API (220ms to 80ms) came from tracing and dashboards first, code second.

I have two years of production Go, PostgreSQL depth, and runbooks still in use after I left. Consensus I know from coursework and a Raft implementation; your deterministic simulator is exactly how I would want to learn the rest.

Public internal SLOs tell me the team means it about correctness. I would like to work on the write path.

Sincerely,

Jane Doe
