Hiring team, Saltcreek Robotics

Re: ML Engineer, Perception

Most of my recall gain at the Lakeshore Vision Lab came from data, not architecture: the hard-negative mining pass I built made a 9-point top-1 improvement stick. Your posting says most wins are dataset wins; I have the receipts to agree.

I train and debug PyTorch models daily, understand CLIP-family methods well enough to fine-tune them on a 2M-image corpus, and served the quantized results to the whole lab.

Evals tied to warehouse KPIs rather than mAP is the sentence that made me apply.

Sincerely,

Jane Doe
